MATH 532 — REGRESSION 2

Section 01

Spring 2023

Course Location: WH 329

Instructor: Dikran Karagueuzian Email: dikran@math.binghamton.edu Course Time: MWF 9:40-10:40 Office: WH 110 Office Hours: MWF 2:50-3:50 **Textbook**: *Extending the Linear Model with R*, by Julian Faraway Website: people.math.binghamton.edu/dikran/532/

Assignments and Grading

Homework problems will typically be assigned on Wednesday, with written solutions due in Gradescope on the following Wednesday. Homework assignments will be posted on the course website.

Collaboration: If you find yourself unable to solve a homework problem after working for some time by yourself (as will certainly happen!), you are encouraged to work on your homework with other students. When you do, write the names of your collaborators at the top of your submitted solutions. However, you must write up your solutions independently. You may not directly copy solutions from any source, whether that be a solution manual, a fellow student, or a shared resource during collaboration or office hours.

Dropped Homeworks: Before computing the homework and quiz portions of your grade, I will drop your two lowest homework scores.

Exams: There will be one in-class midterm exam and a final exam or project. Grade Breakdown: Midterm Exam: 15% Final Exam: 25% Homework: 60%

ACADEMIC HONESTY

Students are asked to practice care and attention in regard to academic honesty, with the understanding that all cases of plagiarism, cheating, multiple submission, and unauthorized collaboration are subject to penalty. Students must properly cite and attribute all sources used for assignments, including collaboration with other students. Students may not collaborate on exams, directly or through virtual consultation, unless the instructor gives specific permission to do so. Posting an exam, assignment, or answers to them on an online forum (before, during, or after the due date), in addition to consulting posted materials, constitutes a violation of the University's Honesty policy. Likewise, unauthorized use of live assistance websites, including seeking "expert" help for specific questions during an exam, can be construed as a violation of the honesty policy. All students should be familiar with the University's Student Academic Honesty Code.

ACCOMMODATIONS FOR DISABILITIES

Students requesting disability-related accommodations should register with the Services for Students with Disabilities office (SSD). They are the appropriate entity on campus to determine and authorize disability-related accommodations. The office is in the University Union, room 119. Phone number 607-777-2686. For students already registered with SSD, please provide your academic accommodation letter as soon as possible so that we can discuss the implementation of your accommodations.
