Math 148 - Elementary Bio Stats

Spring 2017 Homework 10

This homework is different from the others, due to the unexpected loss of Wednesday's lecture and Tuesday's sections.

- The problems are drawn from the exercises at the end of each subchapter 17B, 17C, 17D and 17E. This means you have access to the solutions.
- This homework will **NOT** be collected, so you are under no pressure to finish it before this week's section. You can look up the solutions to test your understanding.
- You are strongly advised to work through these problems as computation and proper interpretation of standard errors are at the heart of computing confidence intervals and performing hypothesis testing.

Exercises Ch.17, Set B, p.293:   Problems # 1, 2, 3, 6

Exercises Ch.17, Set C, p.296:   Problems # 1, 3, 8

Exercises Ch.17, Set D, p.299:   Problems # 1, 3

Exercises Ch.17, Set E, p.303:   Problems # 1, 2, 6, 7
