

Math 148 - Elementary Bio Stats

Spring 2017 Homework 13

This homework is different from the others because it is assigned over the spring break.

- The problems are drawn from the exercise sets at the end of the relevant subchapters. This means you have access to the solutions.
- This homework will **NOT** be collected, so you are under no pressure to complete all assignments. You can look up the solutions to test your understanding.
- The material needed to solve some of the problems for ch.26 will not yet have been taught by the end of the Friday, April 7 lecture. But you have the solutions, so you can attack those problems after studying the relevant material on your own and checking the solutions given in the book.

If you work through these problems then you are in a good position to easily understand the material of all subsequent chapters. That will help you to do well in the final.

Chapter 21:

- Exercise set A: Problems # 3, 4
- Exercise set B: Problems # 2, 4
- Exercise set C: Problems # 4, 6

Chapter 23:

- Exercise set B: Problems # 4, 5, 6
- Exercise set D: Problems # 1, 2

Chapter 24:

- Exercise set A: Problems # 3, 4

Chapter 26:

- Exercise set A: Problems # 4, 5
- Exercise set C: Problem # 4
- Exercise set D: Problems # 1, 2

Those exercises will not be collected, so you can write them any way you like.
