

Math 330 Section 5 - Fall 2022 - Homework 06

Published: Tuesday, September 13, 2022
Last submission: Friday, September 23, 2022

Running total: 29 points

Status - Reading Assignments:

Here is the status of the reading assignments you were asked to complete by this date.

MF lecture notes:

ch.2 – ch.3; skim ch.4; ch.5.1 – ch.5.2; ch.6.1 – ch.6.2

B/G (Beck/Geoghegan) Textbook:

ch.1 – 2.2, ch.3

B/K lecture notes:

ch.1.1 (Introduction to sets) (optional)

ch.1.2 (Introduction to Functions) but skip ch.1.2.4: Floor and Ceiling Functions (optional)

New reading assignments:

Reading assignment 1 - due Monday, September 19:

- a. Read carefully BG ch.2.3. Note that " $d \mid n$ " for $d, n \in \mathbb{Z}$ and $d \neq 0$ means d divides n (evenly), i.e., the quotient $\frac{n}{d}$ is an integer.
- b. Read carefully MF ch.6.3.
- c. Read carefully BG ch.2.3. Note that " $d \mid n$ " for $d, n \in \mathbb{Z}$ and $d \neq 0$ means d divides n (evenly), i.e., the quotient $\frac{n}{d}$ is an integer.

Reading assignment 2 - due Wednesday, September 21:

- a. Read carefully MF ch.6.4. You have already encountered much of the material in MF ch.2.4.
- b. Skip MF ch.6.5 but carefully read MF ch.6.6 – 6.8

Reading assignment 3 - due Friday, September 23:

- a. Review B/G ch.2.4 through Prop.2.33 and skip the remainder of B/G ch.2.
- b. Review B/G ch.4.1 - 4.5 and skim the remainder of B/G ch.4.

Written assignments are on the next page.

General note on written assignments: Unless expressly stated otherwise, to prove a proposition or theorem you are allowed to make use of everything in the book up to but NOT including the specific item you are asked to prove.

Written assignment 1:

Let $X, Y \neq \emptyset$ and $f : X \rightarrow Y$.

(a) Prove that $R := \{(x, x') \in X \times X : f(x) = f(x')\}$ is an equivalence relation on X .

(b) For the special case $f : \mathbb{R} \rightarrow \mathbb{R}; x \rightarrow x^2$ compute the equivalence classes $[2], [0], [-2]$ for this equivalence relation.

One point each for (a) and (b)!!

Written assignment 2:

Prove formulas (5.15) and (5.16) of Proposition 5.3: Let $f : X \rightarrow Y$. Then

(a) (5.15) $A_1 \subseteq A_2 \subseteq X \Rightarrow f(A_1) \subseteq f(A_2)$

(b) (5.16) $B_1 \subseteq B_2 \subseteq Y \Rightarrow f^{-1}(B_1) \subseteq f^{-1}(B_2)$

One point each for (a) and (b)!!
